#### **General information:**

In case of excessive inhalation, take the person to fresh air and keep them in a resting position. Consult a doctor.

If you wear contact lenses, remove them. In case of contact with the eyes, rinse the eyes thoroughly with water for about twenty minutes. If irritation persists, or if lesions appear, consult a doctor.

Rinse mouth with water. Do not give anything to drink. Do not attempt to induce vomiting and call a doctor.

Remove contaminated clothing immediately, wash the skin with water and soap, and rinse thoroughly for at least 20 minute. If irritation persists or if lesions appear, consult a doctor.

In case of accident or unwellness, seek medical advice immediately (show directions for use or safety data sheet if possible).

Remove victim out of the danger area.

Keep affected person warm, still and covered.

Do not leave affected person unattended.

#### **Following inhalation:**

In case of excessive inhalation, take the person to fresh air and keep them in a resting position. Consult a doctor.

Remove person to fresh air and keep comfortable for breathing.

#### **Following skin contact:**

Remove contaminated clothing immediately, wash the skin with water and soap, and rinse thoroughly for at least 20 minute. If irritation persists or if lesions appear, consult a doctor.

Take off contaminated clothing.

In case of skin irritation, consult a physician.

Remove contaminated, saturated clothing immediately.

After contact with skin, wash immediately with plenty of water and soap.

In case of skin reactions, consult a physician.

#### **Following eye contact:**

If you wear contact lenses, remove them. In case of contact with the eyes, rinse the eyes thoroughly with water for about twenty minutes. If irritation persists, or if lesions appear, consult a doctor.

In case of eye irritation consult an ophthalmologist.

Rinse immediately carefully and thoroughly with eye-bath or water.

Remove contact lenses, if present and easy to do. Continue rinsing.

Protect unharmed eye.

**Following ingestion:**

Rinse mouth with water. Do not give anything to drink. Do not attempt to induce vomiting and call a doctor.  
 Never give anything by mouth to an unconscious person or a person with cramps.  
 IF SWALLOWED: Rinse mouth.  
 Do NOT induce vomiting.

**Self-protection of the first aider:**

First aider: Pay attention to self-protection!

**4.2 Most important symptoms and effects, both acute and delayed**

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11.

**4.3 Indication of any immediate medical attention and special treatment needed**

**Notes for the doctor:**

Treat symptomatically.

section <b>5</b>	<b>Firefighting measures</b>
---------------------	------------------------------

**5.1 Extinguishing media**

**Suitable extinguishing media:**

Foam.  
 Extinguishing powder.  
 Carbon dioxide (CO<sub>2</sub>).  
 Sand.

**Unsuitable extinguishing media:**

Strong water jet.

**5.2 Special hazards arising from the substance or mixture**

Formation of toxic gases is possible during heating or in case of fire.

**5.3 Advice for firefighters**

Wear a self-contained breathing apparatus and chemical protective clothing.

**Additional information**

Do not inhale vapors and fumes.  
 Co-ordinate fire-fighting measures to the fire surroundings.  
 Move undamaged containers from immediate hazard area if it can be done safely.  
 Use caution when applying carbon dioxide in confined spaces. carbon dioxide can displace oxygen.  
 Use water spray jet to protect personnel and to cool endangered containers.  
 Collect contaminated fire extinguishing water separately. Do not allow entering drains or surface water.

section <b>6</b>	<b>Accidental release measures</b>
---------------------	------------------------------------

**6.1 Personal precautions, protective equipment and emergency procedures**

Do not smoke. Do not expose to a flame or any potential source of ignition (e.g. electrical equipment).  
 Avoid contact with the skin, as well as inhalation of vapors. Ensure adequate ventilation of the workplace.  
 Do not expose to flame or any potential source of ignition (e.g. electrical equipment).  
 Ensure adequate ventilation of the workplace.  
 Avoid contact with skin and eyes.  
 The participants will be equipped with appropriate personal protective equipment.  
 Use personal protection equipment.  
 Remove persons to safety.

**6.2 Environmental precautions**

Avoid any direct discharge into the sewer, surface water, and groundwater, do not allow penetration into the soil (see point 6.3).  
 Ensure that waste is collected and contained.

In case of gas escape or of entry into waterways, soil or drains, inform the responsible authorities.

Avoid release to the environment.

Cover drains.

Ensure all waste water is collected and treated via a waste water treatment plant.

Do not allow to enter into soil/subsoil.

Do not allow to enter into surface water or drains.

Retain contaminated washing water and dispose it.

Contain leaks or spills within cabinets with removable trays.

### 6.3 Methods and material for containment and cleaning up

Absorb material with inert absorbent powders or granules (sand...).

Significant overflows must be absorbed by sand or an inert powder, then disposed of according to current regulations.

If rags are used for wiping, dispose of them quickly by incineration, as cases of self-oxidation with spontaneous combustion are known.

Clean the powder with a vacuum cleaner. Wash with water and detergent.

Elimination of gases/smoke by water spraying.

Wash with water and detergent.

Treat the recovered material as prescribed in the section on waste disposal.

Collect in closed and suitable containers for disposal.

Clean contaminated objects and areas thoroughly observing environmental regulations.

Collect spillage.

Absorb with liquid-binding material ( e.g. sand, diatomaceous earth, acid- or universal binding agents).

Wipe up with absorbent material (eg. cloth, fleece).
