## section 4 First aid measures

### 4.1 Description of first aid measures

#### General information:

In case of accident or unwellness, seek medical advice immediately (show directions for use or safety data sheet if possible).

Do not leave affected person unattended.

Remove victim out of the danger area.

Keep affected person warm, still and covered.

#### Following inhalation:

Remove person to fresh air and keep comfortable for breathing.

#### Following skin contact:

Remove contaminated, saturated clothing immediately.

After contact with skin, wash immediately with plenty of water and soap.

Take off contaminated clothing.

In case of skin reactions, consult a physician.

#### Following eye contact:

In case of eye irritation consult an ophthalmologist.

Rinse immediately carefully and thoroughly with eye-bath or water.

Remove contact lenses, if present and easy to do. Continue rinsing.

#### Following ingestion:

Never give anything by mouth to an unconscious person or a person with cramps.

IF SWALLOWED: Rinse mouth.

Do NOT induce vomiting.

#### Self-protection of the first aider:

First aider: Pay attention to self-protection!

### 4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11.

### 4.3 Indication of any immediate medical attention and special treatment needed

#### Notes for the doctor:

Treat symptomatically.

## section 5 Firefighting measures

### 5.1 Extinguishing media

**Suitable extinguishing media:**

Foam.  
 Extinguishing powder.  
 Carbon dioxide (CO<sub>2</sub>).  
 Sand.

**Unsuitable extinguishing media:**

Strong water jet.

**5.2 Special hazards arising from the substance or mixture**

Formation of toxic gases is possible during heating or in case of fire.

**5.3 Advice for firefighters**

Wear a self-contained breathing apparatus and chemical protective clothing.

**Additional information**

Do not inhale vapors and fumes.  
 Co-ordinate fire-fighting measures to the fire surroundings.  
 Move undamaged containers from immediate hazard area if it can be done safely.  
 Use caution when applying carbon dioxide in confined spaces. carbon dioxide can displace oxygen.  
 Use water spray jet to protect personnel and to cool endangered containers.  
 Collect contaminated fire extinguishing water separately. Do not allow entering drains or surface water.

**6 Accidental release measures**

**6.1 Personal precautions, protective equipment and emergency procedures**

Use personal protection equipment.  
 Remove persons to safety.  
 Use appropriate respiratory protection.  
 Provide adequate ventilation.

**6.2 Environmental precautions**

Ensure that waste is collected and contained.  
 In case of gas escape or of entry into waterways, soil or drains, inform the responsible authorities.  
 Avoid release to the environment.  
 Cover drains.  
 Ensure all waste water is collected and treated via a waste water treatment plant.  
 Do not allow to enter into soil/subsoil.  
 Do not allow to enter into surface water or drains.  
 Retain contaminated washing water and dispose it.  
 Contain leaks or spills within cabinets with removable trays.

**6.3 Methods and material for containment and cleaning up**

Treat the recovered material as prescribed in the section on waste disposal.  
 Collect in closed and suitable containers for disposal.  
 Clean contaminated objects and areas thoroughly observing environmental regulations.  
 Collect spillage.  
 Absorb with liquid-binding material ( e.g. sand, diatomaceous earth, acid- or universal binding agents).  
 Wipe up with absorbent material (eg. cloth, fleece).

**6.4 Reference to other sections**

Safe handling: see section 7.  
 Disposal: see section 13.  
 Personal protection equipment: see section 8.

**7 Handling and Storage**

## 7.1 Precautions for safe handling

### PROTECTIVE MEASURES:

Avoid contact with skin, eyes and clothes.

Wear personal protective clothing (see section 8).

Provide adequate ventilation as well as local exhaust at critical locations.

Follow appropriate hygiene rules: do not drink, eat or smoke during handling.

Do not expose to flames or potential sources of ignition.

### Advices on general occupational hygiene:

Wash hands before breaks and after work.

Street clothing should be stored separately from work clothing.

Wash contaminated clothing before reuse.

Remove contaminated, saturated clothing immediately.

Work in well ventilated zones or use proper respiratory protection.

### In the immediate working surroundings there must be:

Provide eye shower and label its location conspicuously.

## 7.2 Conditions for safe storage, including any incompatibilities

Store at room temperature (20°C +/- 5°C), in a cool, dry, well-ventilated place, protected from light, in the original containers if possible, full and tightly closed.

Keep away from all sources of ignition.

### Requirements for storage rooms and vessels:

Once opened, all containers must be carefully closed and positioned vertically to avoid tipping.

### Advice on joint storage:

Keep away from food, drink and animal feedingstuffs.

## 7.3 Specific end uses

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated.

# 8 Exposure controls/personal protection

## 8.1 Control parameters

### Occupational exposure limits:

Not available

### Biological limit values:

Not available

### Exposure limits at intended use:

Not available

### Remark:

Not available

## 8.2 Exposure controls

### Appropriate engineering controls:

Technical measures and the application of suitable work processes have priority over personal protection equipment.

Provide adequate ventilation as well as local exhaust at critical locations.

### Individual protection measures, such as personal protective equipment:

**Eye/face protection**

: **Suitable eye protection:**

Wear eye protection equipment.

**Recommended eye protection articles:**

Eye glasses.

**Skin protection**

: **Hand protection:**

Suitable gloves type:

## Respiratory protection

Wear protective gloves.

### Additional hand protection measures:

Do not wear gloves near machines and rotating tools.

Use gloves only once.

### Remark:

When handling with chemical substances, protective gloves must be worn with the CE-label including the four control digits.

The quality of the protective gloves resistant to chemicals must be chosen as a function of the specific working place concentration and quantity of hazardous substances.

For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves.

Breakthrough times and swelling properties of the material must be taken into consideration.

### Body protection:

#### Suitable protective clothing:

Lab coat.

#### Respiratory protection necessary at:

If technical exhaust or ventilation measures are not possible or insufficient, respiratory protection must be worn.

#### Suitable respiratory protection apparatus:

Wear respiratory protection.

### Remark:

The filter class must be suitable for the maximum contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If the concentration is exceeded, self-contained breathing apparatus must be used.

Observe the wear time limits as specified by the manufacturer.

Use only respiratory protection equipment with CE-symbol including four digit test number.

**13 Disposal considerations**

**13.1 Waste treatment methods**

**Product/Packaging disposal:**

**Waste codes/waste designations according to EWC/AVV:**

The allocation of waste identity numbers/waste descriptions must be carried out according to the EEC, specific to the industry and process.

**Waste treatment options:**

**Appropriate disposal/Product:**

Waste requiring special supervision.  
 Dispose of waste according to applicable legislation.  
 Delivery to an approved waste disposal company.

**Appropriate disposal/Package:**

Non-contaminated packages must be recycled or disposed of.  
 Contaminated packing must be completely emptied and can be reused after proper cleaning.  
 Packing which cannot be properly cleaned must be disposed of.  
 Handle contaminated packages in the same way as the substance itself.  
 Dispose of waste according to applicable legislation.

**Remark:**

For recycling, contact manufacturer.  
 Collect the waste separately.  
 Consult the appropriate authorities about waste disposal.  
 Do not mix with other wastes.  
 The waste is to be kept separate from other types of waste until its disposal.  
 Concerning the waste it has to be checked, whether a transport authorisation is required.
